

## Web Hosting

Trac-It Systems prides itself on being a different kind of hosting company. Our clients are not just numbers to us, they are people.

With our relentless commitment to excellence in service, World Class technical infrastructure, competitive pricing, and unmatched customer support, Trac-It Systems distinguishes itself from the competition.

At Trac-It Systems we offer the latest technologies, reliability and great flexibility when designing a hosting package for our clients. Our web servers use the latest technology to make sure your presence on the Internet is reliable.

Trac-It Systems can provide you with any service, from hosting your e-mail to dedicated servers and VPS hosting.

Hosting your Co-Located server with Trac-It Systems will provide your site with the power, security and reliability you and your customers have come to expect when doing business on the Internet. Ship us your pre-configured server or let us build a custom web server.

Accommodating Custom web sites and applications is a Trac-It Systems specialty. Trac-It Systems combines bandwidth, reliability, and plenty of disk storage to deliver powerful hosting solutions. We create custom packages for clients who demand high data-transfer speeds and optimum server performance without the hassle of machine maintenance.

All dedicated servers are housed in a secure, fireproof, climate-controlled data centers with a direct connection to the Internet backbone. Multiple, high-speed connections ensure that your server is always up and running, and Trac-It Systems' network support team is on call around the clock to respond to emergency outages. The special software we use to monitor your server automatically alerts technicians, so we can address problems immediately.

Let us take care take care of all the details for you.
