

## Hosted Exchange Server

Exchange Mail Hosting from Trac-It Systems offers the best integration with the broadest range of clients; supporting a complete Outlook experience, from Outlook 2007 on the desktop to Outlook Web Access (OWA), ActiveSync with Direct Push Technology. Exchange Mail Hosting delivers the advanced protection your company demands, and the anywhere access your people want. Access e-mail, voice mail, calendar, and contacts from virtually anywhere, anytime.

Quite simply, Hosted Exchange Server allows you to access your e-mail, calendar and contacts from anywhere in the world. All the data is stored on a central server and available to your desktop, laptop and smartphone (such as iPhone & BlackBerry) anywhere in the world. Any information you change in one is automatically synchronized across all your devices. You can even securely access the data from a web browser. You can also choose to share your information with other members of your team so that they can check your schedule & contacts to help you manage your time.

Every account includes:

- Exchange 2007
- Unlimited Mailbox Size
- 100MB SharePoint Site (per account, not per mailbox)
